Acrylic Belt Conveyor Hood Covers

Also known as conveyor hoods, conveyor belt Covers serve a number of purposes. Conveyor owners may want to protect the material they handle from weather conditions like rain or wind. In some cases, local governing bodies require conveyors to be covered to limit dust or dispersion of powders.

CBC002

Galvanized Steel Conveyor Belt Covers

CBC-Series covers assemblies are full 180° coverage and are hinged so they can be quickly and easily opened for inspecting or viewing the items being conveyed. They also allow for ease of repairing, replacing, greasing or inspecting of the idlers. Conveyor hoods help to protect the belt, idlers and material being conveyed from the hot sun, wind, snow, rain and other damaging weather elements.

Fiberglass Conveyor Hood Covers

Fiberglass Reinforced Panels (FRP) are plastic sheets that come in both flat and corrugated options. They have a wide variety of uses including roofing, skylights, wall covers, greenhouses, and more. Flat plastic panels commonly have designs, textures, or patterns molded into the plastic, while corrugated plastic sheets are typically smooth to the touch.
